

CMCP650 BNC Retrofit Kit

Features:

- Easy Connection for Data Collectors and Analyzers
- Same as "Factory Installation"
- Easy to Use, Instructions Included
- All Parts Required
- Retrofit for Existing Extensions Cables
- In Stock for Immediate Delivery

The CMCP650 Kit is a economical and quick way to retrofit Female BNC Connectors to the end of Accelerometer Extension Cables. All parts required are included and in a handy organizer so parts are not lost or misplaced. Simply follow the included instructions for a "Factory" installation. Customer will need to supply a Soldering Iron and a Adhesive Dispenser (CMCP207).

Installing BNC Connectors on the end on Accelerometer Extension Cables provides a convenient way to connect Data Collectors and Analyzers to field mounted Accelerometers mounted in areas not suitable or economical for a BNC Junction Box or Switch Box (CMCP300 and CMCP310).

Each Kit Includes:
